

Syntesi 350

Designed and built to solve the typical problem of traditional concrete mixers. The transmission system inserted in the arm and the convenient worm screw tilting system make it noiseless and light-weight and at the sametime sturdy and reliable.

Powerful and versatile, it batches the most difficult products, both traditional and pre-mixed materials thanks to its high power, increased speed and the possibility to reverse the direction of rotation of the paddles.

Mix 120 Plus

Model	Mix 120 Plus	Syntesi 350
Drum Capacity	120L	345L
Drum Diameter	745mm	823mm
Wheel Dimension	-	385x90 ømm
Motor Power Rate	1.4kW	1.4kW
Running Current	9A	8A
SPL in Operator 's Position	70dB(A)	72dB(A)
Weight	130kg	175kg
Actual Yield	90L	-
Paddle Speed	38rpm	-
Dimension (WxLxH)	745x842x1277 (mm)	930x1610x1600 (mm)

MIX 360

They are the optimum equipment for bagged pre-mixed materials and soils.

MIX 750

New geometry of the mixing paddles for fast and homogeneous batching with optimum discharging speed. The drum base is generously sized to reduce wear, the mixing paddles are fitted with rubber inserts for cleaning the mixing drum. The “mushroom” guard above the rotation shaft distributes the material evenly within the drum. The new-designed mixing gearmotor ensures torque even in the most demanding batches.

Model	MIX 360	MIX 750
Drum Capacity	360L	750L
Mixing Performance	200L	480L
Drum Diameter	952mm	1300mm
Paddle Speed (Electric Motor)	36rpm	35rpm
Motor Power (Electric Motor)	3kW	4kW
Electric Motor Running Current	7.2A	9A
SPL in Operator's position	70dB(A)	70dB(A)
Discharge Height (min-max)	445-745mm	570-720mm
Weight	357kg	720kg
Dimension (WxLxH)	1080x1680x1155(mm)	1730x2279x1680(mm)
